

Bobs & Lolo

music ★ movement ★ make-believe

Lyrics from Bobs & Lolo - Musical Adventures

On Your Feet

Step by step, join right in
Feel the music, makes you grin
Sway your hips; don't miss a beat
Come on everybody on your feet!

Step to the left and to the right
Wave your hands with all your might
Take a turn and spin around
Reach for the sky and touch the ground!

First the bass and then the drums
Keyboard plays while guitar strums
Bring your moves; don't delay
It's a Musical Adventure kind of day!

I Love Bugs!

My favourite critters are really small,
They wiggle and flutter and squirm and crawl
You can find them all over, inside and out,
Every time I find one, I just want to shout...

Chorus
I love bugs! I love bugs!
I love the itty bitty, creepy crawly,
Itsy bitsy, wiggly squirmy bugs!

Ladybugs, stick bugs, roaches and bees,
Mosquitoes and crickets and beetles and fleas,
Dragonflies, butterflies, red ants too
So many favourites, I don't know what to do!

Chorus

Bridge
You find them in the trees, and down on the ground
You find them on flowers, and flying around
And if you're really lucky, and hopefully don't care,
You might even find one crawling in your hair!

Chorus

They've got two legs, four legs, six legs (wow!)
If you look around closely you might see one now
Some of them eat veggies, some of them eat meat,
But for some of them, garbage is the biggest treat!

My Bike

My bike is shiny and new,
Riding the whole day through
Is my favorite thing to do!
I love to feel the wind
Riding next to all my friends
My bike always makes me grin!

Chorus

When I get on my bike
I want to shout hooray
It makes me so happy
To ride my bike all day
Up the hills and down so fast
I travel all around
My bike and I together
On the best ride in town!

My bike has a kickstand
Two wheels each with a yellow band
I ride all over the land!
Adventures lie ahead
Helmet tightly on my head
I ride 'til it's time for bed!

Chorus

Bridge
Spin your wheels
Pedal your heels
Reach for the handlebars
Tap the brakes
No mistakes
Here we go
You're a biking star!

Chorus

Shadow Friends

I watch the sun peek out from behind the clouds
I look beside me and see my outline on the ground
I stop and look around and what do my eyes see
All the other boys and girls have outlines just like me

Chorus

You are never alone
When you have a shadow to call your own
So remember you can always depend
On your shadow to be a friend

My shadow stayed with me for the rest of the day
But when it got dark, it began to fade away
I started to miss my friend but then I realized
My flashlight brought my shadow back,
Right before my eyes

Chorus

Bridge

Your shadow can,
Scrunch down low
And get real small
Stretch out big
And get real tall

Get your,
Arms out wide,
Now bring them in
Take a bow
Then do a spin

Chorus

Go, Go, Grow (repeat after me)

Heading out to the garden
(Heading out to my garden)
With your seeds in your hand
(With my seeds in my hand)
Got your galoshes on
(Got my galoshes on)
And your watering can
(And my watering can)

Find a sunny spot
(Find a sunny spot)
Dig a little hole
(Dig a little hole)
Plant your seeds right there
(Plant my seeds right there)
And watch them go, go, grow

Chorus

Little seed, what will you be
A daisy, a pumpkin or an apple tree
Little seed, one day you may be
A poppy, a carrot or some broccoli
Little seed, what will you be
A watermelon or some strawberries
Little seed, just what will you be

Take your watering can

(Take my watering can)

Give it a little tip

(Give it a little tip)

Not too much water

(Not too much water)

Just a little bit

(Just a little bit)

In a couple of days

(In a couple of days)

A little sprout will show

(A little sprout will show)

You gotta cheer it on

(You gotta cheer it on)

Come on, go, go, grow!

Chorus

Little seed, what will you be
Some roses, tomatoes or some celery
Little seed, one day you may be
Corn, cucumber or some rosemary
Little seed, what will you be
Some squash, snapdragons or a vine of peas
Little seed, I can't wait to see

Bridge

Hey, did you know

That we are all just like these seeds

That need to grow

So make sure that you,

Eat your fruits and vegetables

And little seeds, take care

And you will know

That everyday you'll grow, grow, grow!

So, little seed, what will you be
A baker, a dentist or a hockey goalie
Little seed, what will you be
A nurse, fire fighter or a secretary
Little seed, what will you be
A gardening parent with a family
Little seed, what do you want to be
Oh little seed, I can't wait to see!

Honk for Canada

The Canadian national bird
Is the famous common loon
It started in Ontario
But now all Canada sings its tune!

Nunavut loves rock ptarmigan
Newfoundland Atlantic puffin
Manitoba great grey owls
But where does the goose fit in?

Chorus

What ever happened to the Canada goose?
Was he ever in the running?
With his black webbed feet
And his noisy beak
I think he really is quite stunning!

Tweet, Tweet Chirp, Chirp
Tweedle-ee-dle-ee-dle-ee-dle
Tweet, Tweet Chirp, Chirp
Tweedle-ee-dle-ee-dle la!

Tweet, Tweet Chirp, Chirp
Tweedle-ee-dle-ee-dle-ee-dle
Tweet, Tweet Chirp, Chirp
Tweedle-ee-dle-ee-dle HONK!

The Yukon has the raven
BC the Steller's jay
Alberta has the great horned owl
Nova Scotia amazing osprey

New Brunswick likes black-capped chickadees,
Quebec the snowy owl
Saskatchewan loves sharp-tailed grouse
But where's the waterfowl?

Chorus

Bridge

With their long black necks,
And brown jackets,
They form the flying "Vs"
Always honking loud,
It makes me proud,
To sing for Canadian geese!

Prince Edward Island has the blue jay
The Northwest Territory gyrfalcons
But I wonder how it happened,
That we forgot our honking friends

The Great Outdoors

what do you hear?
what do you see?
camping with friends and family!
what do you hear?
what do you see?
the great outdoors is the place to be
I said the great outdoors is the place to be!

Now when you're out camping, what can you do?
look up and watch the clouds make shapes for you
explore all around with a friend or two
paddle out on the water in a big canoe

before it gets dark, set up the camp site
pitch your tent where you want to sleep tonight
as the evening comes there's a warming light
from the camp fire burning strong a bright

then what do you know?
we roast marshmallows!
and when it's time for camp songs
(everyone sings along!)
everybody in the whole camp sings along
everybody in the whole camp sings along

what do you hear?
what do you see?
camping with friends and family!
what do you hear?
what do you see?
the great outdoors is the place to be
I said the great outdoors is the place to be!

look at the night sky and what do you see?
bright stars twinkling down at me
moon light shining through the trees
tree tops swaying in the evening breeze

now it's time for bed, but what do you hear?
"hoot hoot" it's an owl and it must be near!
"buzz buzz" the mosquito whispers in my ear
"chirp chirp" goes the cricket singing loud and clear

now the day is done
it was so much fun
turn out your flashlight
and listen to the critters play in the night!
you can listen to the critters play in the night!

Little Breeze

Little breeze, sailing through the sky
Little breeze, moving gently by
Little breeze, dancing with the leaves
Soar like the wind little breeze

Chorus

The clouds move through the sky with you
A world of magical scenes
The stars wink from up above at you
Tiny wishes built on dreams

Little breeze, drift away the hours
Little breeze, whisper to the flowers
Little breeze, dancing with the leaves
Soar like the wind little breeze

Chorus

Little breeze, stronger every day
Little breeze, going on your way
Little breeze, higher than the trees
Soar like the wind little breeze

Chorus

Little breeze, sailing through the sky
Little breeze, moving gently by
Little breeze, dancing with the leaves
Soar like the wind little breeze
Soar like the wind little breeze

Skip, Jump and a Hop!

Wake-up, stretch out
A new day to greet
Get up, get dressed
Adventures to meet

Chorus

And it's a...
Skip, jump and a hop
To the great outdoors
Where every rock, tree and flower
Has a secret in store
And it's a...
Skip, jump and a hop
To a world of fun
In any backyard or park
Come rain, clouds or sun

Blue skies, green grass
Birds sing in the trees
A bug, a stream
A warm summer breeze

Chorus

Bridge
Skip, jump, hop
So much to see
No time to stop
Hop, jump, skip
An outdoor,
Adventure trip!

Come on, let's go
Time's passing by
A world of fun
Awaits you outside

Shake It Up

Shake it up,
Squirt it on,
Keep your skin covered,
All day long!

Before going outside in the sun,
We need to prepare for fun, fun, fun,
Put your sunhat, sunglasses, sunscreen on
And protect your skin to the beat of this song

Chorus

Start with one arm and shoulder and then the next,
Get your face, your ears, your neck and your chest,
Don't forget you tummy and finally,
Get your back, your legs, your feet and your knees

Shake it up,
Squirt it on,
Keep your skin covered,
All day long!

Rub your sunscreen in don't miss a spot,
Because the sun is hot, hot, hot
It's not fun when you get a sunburn,
So these are the steps you need to learn.

Chorus

Shake it up,
Squirt it on,
Keep your skin covered,
All day long!

Raindrop Pop

Why do the raindrops fall from the sky?
And where does the water go,
When the puddles run dry?
Why does the stream leave in the middle of the heat?
And where does the river flow,
When it sun starts to beat?

Chorus

Raindrop, raindrop, raindrop pop
Raindrop, raindrop, raindrop pop

Rain falls from the sky, leaving puddles on the ground
Rain comes from clouds
That are too heavy to get around
Rain washes to the streams and into the sea
It washes over Earth,
Bringing life to plants and trees

Chorus

When the sun beats down, in the heat of the day,
The water on the earth,
Starts to evaporate away
It rises to the sky, back to where it began.
The water cycle flows,
From the earth and back again

Chorus

Wish for a Fish

Ohhhh...

The great white sturgeon is a
Living dinosaur,
It's been around on earth
60 million years or more
A giant of the rivers
A special type of fish
But they need our help, so,
Let's all make this wish!

Chorus

One, one, one, for the rivers to run clear
Two, two, two, for 60 million more years
Three, three, three, for the world to understand
We need to join together
And give this fish a hand
C'mon! (clap)

Ohhhh...

The sturgeon has many
Tools to stay alive,
Their armor called scutes
Help our fishy friends survive,
Whisker-like barbells,
Help them find a tasty dish
But they still need help, so,
Let's all make this wish!

Chorus

Ohhhh...

The great white sturgeon
In the mighty Fraser River,
Can grow to 20 feet long and
Some say even bigger
For a hundred years or more
Live these prehistoric fish
But they still need help, so,
Let's all make this wish!

Recycle With Me

To keep our world a special place
We need to reduce the amount we waste
So many things we throw away
Can be reused in other ways

Take a cardboard box build a rocket ship
Blast off with friends on an outer space trip
Next rinse out your used bottles and cans
Now you've all turned into a marching band

Chorus

R-E-C-Y-C-L-E; recycle, recycle with me,
R-E-C-Y-C-L-E, recycle with me
Imagination's all it takes
Recycle; recycle with me
Imagine what we will create?
Recycle and you will see
Recyclers you and me (2nd time through only)

When your socks wear out with holes in them
Add some buttons, you've got new puppet friends
Newspapers great for paper mache
Makes a great piñata for a friends birthday

Some cans and string make stilts for feet
You can stomp around to this rhythm and beat
Roll up some junk mail into a cone
Now you've got your very own megaphone

Chorus

Recycled sounds are what we hear
Everybody's smiling ear to ear
It's your turn to jam along
'Cause we all play a special part in this song!

Chorus

Celebrate the Seasons

Fall brings the changing colours of the leaves,
Red, orange, brown, yellow, what a sight to see,
I watch them gently float down to the ground
And rake them into piles and jump around

The seasons bring with them so much fun
I love to play each day until it's done
Being outside in the crisp, clean air
Celebrate the seasons throughout the year

Winter drifts like snowflakes on a breeze
Icy breath, watch the world around you freeze
Spring appears with a flowering surprise
Growing plants, the air is fresh outside

The seasons bring with them so much fun
I love to play each day until it's done
Being outside in the crisp, clean air
Celebrate the seasons throughout the year

Bridge

Fall, winter and spring
Enjoy the fun each season brings
But my favorite's last to come
Blue skies, bright sun & lots of fun

Summer sails in as the seasons go by,
Climbing trees, flying kites up in the sky
Head to the beach, explore the rocky shore
Play in the sand; jump waves & so much more

The seasons bring with them so much fun
I love to play each day until it's done
Being outside in the crisp, clean air
Celebrate the seasons throughout the year

Musical Adventure

Going on a musical adventure
Note by note by note
Going on a musical adventure
Da da da da da

Its time to dance, its time to sing
What will your imagination bring?
Movement, music & make-believe
The only things that you will need

Going on a musical adventure
Note by note by note
Going on a musical adventure
Da da da da da

Under the sea, up in the sky
High over mountains you can fly
A pirate's treasure, a dinosaur's roar
Through any dream you can soar

Going on a musical adventure
Note by note by note
Going on a musical adventure
Da da da da da

Clap your hands; jump up & down
Let the music move you around
Snap your fingers, stomp your feet
Sway your body to the beat

Going on a musical adventure
Note by note by note
Going on a musical adventure
Da da da da da
